

My name is Rusty Bevel. I am a husband and father of two. I am concerned about LPFM replacing the current FM translator service. If this happened, Air 1 radio station would be taken off the air in my region. Air 1 serves as a great inspiration and motivation for me in my daily life. It serves as a great alternative to all of the morally bankrupt stations that are left. Before I became a christian, I had a severe drinking problem. I cant tell you how much air 1 did to encourage me on a daily basis. It was one of the only stations I could listen to that offered continuous encouragement. It would be devastating to remove them from the air. I also have two young children and it is great to be able to listen to Air 1 with them instead of all the other stations that play songs about drinking, sex, violence, and cheating. I know other people just like me that love to have a positive alternative like Air 1. There are many people who are trying to turn their lives around that need Air 1 for encouragement. It would be in the best interest of the public to have such a great alternative. To replace the current FM translator service with LPFM would be devastating. Thank you for your time and willingness to here the public.

God Bless.
